Clean water for all!

Your health and
well-being are
a reflection of the
water you choose.

Designed, assembled,
and tested in the USA.

ADVANTAGES AND BENEFITS

PROFESSIONAL INSTALLATION

Compliant with City and State codes.

Step 8 CONNECT VIA WIFI

Stay informed about the operation, consumption, and quality of your water from your phone.

Step 6 Ultraviolet (UV) Sterilization

Eliminates bacteria, viruses, and microorganisms that cause fever, diarrhea, stomach pain, headaches, and more.

Step 5 Filter to Remove Heavy Metals

Removes arsenic and lead, which are linked to cancer and other diseases.

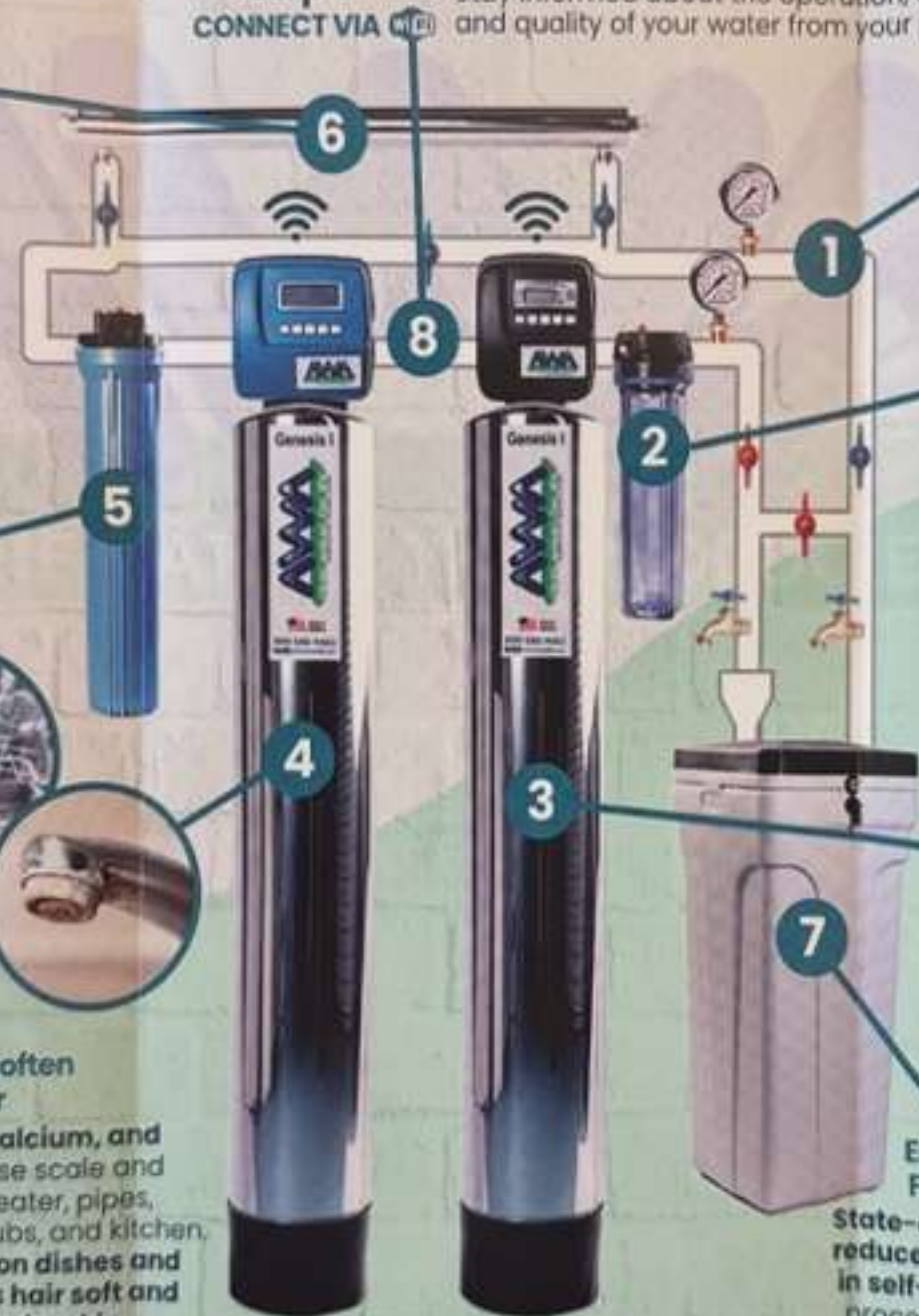

Step 4 Ionization to soften the water

Removes minerals, calcium, and magnesium that cause scale and damage the water heater, pipes, bathroom faucets, bathtubs, and kitchen. It also prevents stains on dishes and bathroom walls. Keeps hair soft and shiny and prevents dry skin.

NO MORE HEAVY WATER JUGS!

Step 2 5-Micron Sediment Filtration

Removes rust and dirt that yellow white clothes, as well as microplastics that affect the circulatory system.

PFAS AND PFOS

Step 3 Filtration with Activated Catalytic Carbon

Eliminates bad odors and tastes, PFAS and PFOS related to cancer and hormonal imbalances, as well as chlorine and chloramines.

**Step 7
Environmentally
Friendly System**
State-of-the-art valves that reduce water and salt usage in self-cleaning, making the process more efficient and eco-friendly.
